(54) Title: **ENERGY EFFICIENT WINDOW**

(57) Abstract: A heat insulating window includes a pair of outer glass panes (10, 12) held apart by a spacing member (16) and surrounded by a frame. One frame member (26) serves as a dessicant concealing member which holds a removeable dessicant cartridge (44). The dessicant cartridge connects to a conduit system (42) providing gas communication to the air space between the glass panes (10, 12).
